

Travertine Bathtub “Culla”

Can a bathtub be a work of art? We don't want to be vain, but our “Culla” bathtub comes very close.

The design of this **bathtub**, in Vinaccia travertine stone, was created in collaboration with an important client of ours: it has received considerable international acclaim thanks to its **modern** and **imposing** lines.

Its shape has been studied to be **ergonomic** and to envelop the person during the relaxation of the bath. The part that supports the back and head is higher to provide support and elevated comfort: this detail defines its characteristic shape.

Dimensions

220 × 110 × 85 cm

Weight

850 kg
