

“Doghe” travertine shower tray

We designed the **shower tray “Doghe” with a robust perimeter frame** that outlines the shower tray itself and two different variants of slats: in travertine or solid wood.

The slats are shaped to create slots through which water flows and that conceal the drain.

These can be easily lifted and removed to facilitate cleaning of the drain itself; the latter remains hidden but easily inspectable.

Dimensions

100 × 80 × 110 cm

Weight

155 kg
