

Light Blend Travertine Slabs MODERN

Light Blend travertine represents the perfect synthesis between the solidity of natural stone and a colour palette oriented towards modernity. Extracted from quarries with a beige background, this material stands out for its meticulous selection process that prioritises uniformity and aesthetic delicacy.

Aesthetic Characteristics

- **Colour:** A bright and warm beige palette that amplifies the natural light in spaces.
- **Texture:** Characterised by light **tone-on-tone clouding**, Light Blend avoids sharp contrasts to offer a visually velvety and harmonious surface.
- **Split Cut:** The 'split cut' process enhances the natural clouding of the stone, giving it a soft and contemporary look, ideal for minimalist or organic interior design.

Versatility and Performance

Don't be fooled by its ethereal elegance: travertine is an extremely resilient stone. Thanks to its technical properties, Light

Dimensions

N/A
