

“Regal” Marble Bathtub

Marble has always been used to create impressive architectural pieces. Even the ancient Romans adorned their villas and homes with white marble bathtubs.

The “Regal” bathtub combines tradition with modernity. Its design is inspired by neoclassical ornamental bathtubs but with a more minimal reinterpretation.

It can be made, upon request, in either white marble or other materials such as light or dark travertine, or Emperador marble: the choice is entirely yours. Its **rounded shapes** make it suitable for both prestigious and classic environments.

Dimensions

220 × 115 × 75 cm

Weight

850 kg
