

Oval travertine bathtub

Natural stone is not usually thought of as a **flexible material**, yet it has always been used not only in construction but also to create decorative and artistic objects.

Today's trend is to add **distinctive elements**, in addition to functional ones, in the bathroom environment.

The **stone and travertine bathtubs** follow this trend, and modern stone processing equipment ensures that prices are now much more affordable than in the past. Our "Oval" bathtub is an excellent example.

Dimensions

220 × 120 × 75 cm

Weight

800 kg
